

ServiceTitan pricebook import — pre-flight checklist

Your own export, columns untouched, units converted, duplicates checked, small batch first.

- ☐ File is the current ServiceTitan export with changes patched in — not a new sheet.
- ☐ Column headers untouched; item IDs and codes preserved on existing items.
- ☐ Every category referenced already exists.
- ☐ Units converted to the pricebook unit; costs numeric.
- ☐ Part numbers in the right fields, exactly as printed.
- ☐ New items checked for near-duplicates; batch checked against itself.
- ☐ Active flags deliberate.
- ☐ Small batch first, three items verified, then the rest.
- ☐ Export + update kept for the run.
